

wherein said polyorganosiloxane is present at a level of at least about 35% by weight, based on the total weight of said fatty material, said polyorganosiloxane, said polyolefin, and said bleaching agent; and

wherein said substituents comprise at least about 5% by weight, based on the total weight of said substituents, of non-terminal hydroxyl groups.

32. The composition of claim 31 wherein the discrete, individual polymer particles are polytetrafluoroethylene (PTFE).
33. A method of treating a textile, comprising the step of:  
contacting said textile with a composition of claim 30.
34. A method of treating a textile, comprising the step of:  
contacting said textile with a composition of claim 31.
35. A composition, comprising:
  - a. at least one fatty material;
  - b. at least one polymer selected from the group consisting of water-dispersible polyolefin, water-soluble polyorganosiloxane having substituents, and water-dispersible polyorganosiloxane having substituents; and
  - c. discrete, individual polymer particles that are selected from the group consisting of polytetrafluoroethylene (PTFE), polyvinyl acetate (PVA), polyvinyl acetate/acrylic copolymer (PVA/a), and combinations thereof.
36. The composition of claim 35 wherein said polymer particles are polytetrafluoroethylene.
